## Appendix C-1 Site Description

Pattern Santa Isabel Storage LLC (the “Project”) is to be constructed on the south side of the island of Puerto Rico alongside the PR-153 roadway and directly adjacent to the larger Santa Isabel Storage 2 standalone BESS.

### Facility Descriptions

The Project’s BESS is rated at 50 MW / 200 MWh (full power discharge at the POI). The POI refers to the meter located on the primary side of the 115 kV GSU Transformer inside the Santa Isabel Wind Farm’s switchyard as shown in the SLD in [Exhibit B-2 Single Line Diagram](#). The planned distance from the Project to the substation is approximately 0.4 miles.
